

“I just wanted to let you know that we have been very happy with our XES510 plotter... We are printing anywhere between 20,000 and 70,000 square feet of plots per month, and we usually only see your repair people when they perform routine maintenance about every two to three months. This plotter has been what we needed from day one. I wish that Xerox had this model when we first started shopping for a high-speed plotter.”
