

Speaking about the Xerox Account Management Tool Lindsay-Pope-Brayfield is utilizing with their 510 wide-format system:

“I’m very pleased with the accounting system. I like:

- How quick and easy it is to input new User ID’s and Account ID’s
- Being able to see the information about the ID’s (i.e. when they were entered)
- The capacity for the # of ID’s you can have total. I don’t think we could possibly ever fill it up, and I don’t have to do clean-ups to free space anymore
- Being able to see on the Web PMT main page which users are printing and their status (helps to identify who needs assistance with errors or who needs to come change the paper, and I can contact them before they even leave their desk)”
